Solution ▶▶▶

LogistPro

Logist Pro is an integrated cloud logistics software designed to help businesses effectively manage their transportation logistics activities and hold trucking freight transportation service procurement auctions.

BASIC FEATURES:

- ➤ Full automation of transportation processes
- ➤ Holding transparent e-auctions to procure transportation services
- ➤ Two-way communication between shippers and carriers online
- ➤ Integration with any internal ERP system, incl:

- ➤ Real time mode
- ➤ Electronic workflow (incl. supply requests) and digital signature

Result ▶▶▶

LOGIST Pro is an easy-to-use tool that helped our Customer improve performance of transportation department, automate processes and reduce costs

- ➤ Performance of transportation department has been considerably improved through automation of key transportation processes (~ **+10 pp for all KPI**s)

- ➤ Staff's administrative workload and order processing time have been reduced through automation of daily routine activities and procedures of transportation department (**delivery time: 72 h => 48 h; 48 h => 24 h**)

- ➤ Internal Audit Department and field staff received an easy and efficient tool allowing to generate reports for each carrier for a given period of time (in terms of proper time, cost and customer order execution quality items). It will then be used to evaluate carrier rating while holding annual auctions.

Annual audit report has been improved by 25 pp

- ➤ Transportation costs have been significantly reduced (**-12%**)

- ➤ Process automation resulted in creation of a transparent system allowing to procure freight transportation services and build improved relationships with carriers.
